FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair values of all financial instruments are based on the valuation methodology outlined below:

Finance and certificates of deposit

For all finances (including certificates of deposit) the fair values have been taken at carrying amounts as these are not considered materially different from their fair values based on the current yields / market rates and re-pricing profits of similar finance and deposit portfolios.

Investments

The fair values of quoted investments are based on quoted market prices. Unquoted investments, except where an active market exists, are carried at cost less accumulated impairment, if any, which approximates their fair value in the absence of an active market.

The Investment Bank uses following fair value hierarchy that reflects significance of inputs used in making the measurements:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.
